# Treatment Centers for Children with substance use disorders in Paraguay

- A Detoxification Center in Asunción . CENPTRA. Dependent on the Ministry of Public Health and Social Welfare.
- A Therapeutic Community for children in Encarnación, kilometers from Asunción 370 km.

# Child training project

## Intervention with Children for a drug-free life

- By Law N° 6800/21, the Council and Municipal Secretary for the Prevention and Treatment of Addictions are created.
- Lack of professionals trained to intervene with Children with Substance Use Disorders.
- The CHILD Training Project is launched.

# Organization

- The ISSUP Paraguay Chapter organized and implemented the ISS course through the host organization the Norberto Bobio School of Government and Public Policies.
- With support from CICAD OAS, ISSUP Regional and Colombo Plan.

# Training Objectives

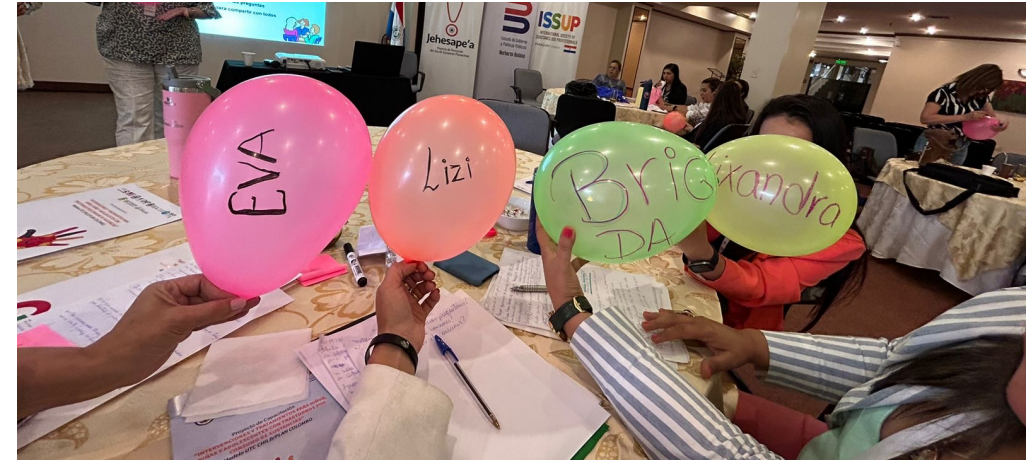

- Develop skills and knowledge based on scientific evidence to apply effectively to children with substance use disorder.
- Update and expand the knowledge required in specialized areas.
- Achieve qualified training, in accordance with the objectives and requirements of the Institutions.
- Support continuity and Institutional development.
- Decentralize existing treatment devices.

# Methodology

- Hybrid mode
- Synchronous virtual sessions.
- Asynchronous sessions (assignments, fórum, videos)
- Face-to-face sessions.

**CONCEPTO CLAVE 8**  
de María Asunción Cabral - lunes, 29 de enero de 2024, 13:30

El Concepto Clave 8 se refiere a

**Los niños expuestos al consumo de sustancias pueden tener condiciones médicas y/o psiquiátricas concurrentes. Estos deben recibir servicios integrales, entre otros, el tratamiento para todas las condiciones de salud.**

1. ¿Podrías reflexionar sobre la mirada que debe realizar el terapeuta para brindar una intervención integral de calidad?
2. ¿Conoces servicios que den respuestas a esta problemática, para recibir un tratamiento integral en el país o en tu comunidad o distrito?

**Re: CONCEPTO CLAVE 8**  
de NORMA NOELIA MOLINAS BOGADO - lunes, 29 de enero de 2024, 16:08

El servicio de atención más completo e integral para el tratamiento de niños expuestos al consumo de sustancias es el Centro Nacional de Prevención y Tratamiento de Adicciones dependiente del MSPBS. Considero que para un tratamiento efectivo debe considerarse algunos aspectos fundamentales como: Evaluación Integral para abordar mas allá de los síntomas identificando necesidades específicas del niño, Enfoque holístico y multidisciplinario para una intervención integral que involucre a varios profesionales y dimensiones de la salud mental, médicos, trabajadores sociales y otros expertos según sea necesario, coordinación de servicios de seguimiento de apoyo continuo que puede incluir terapia individual, tratamiento médico, terapia familiar y otros servicios de apoyo para garantizar la sostenibilidad de los resultados positivos; acompañado de servicios integrales para el tratamiento en la comunidad, articulación con organizaciones comunitarias que apoyen.

- Post test results ( Evaluation of participants learning).
- Participant evaluations of the Training ( Rating of content, relevance of course materials, competency of trainers, and comments on the experience and overall value of the course for each participant).

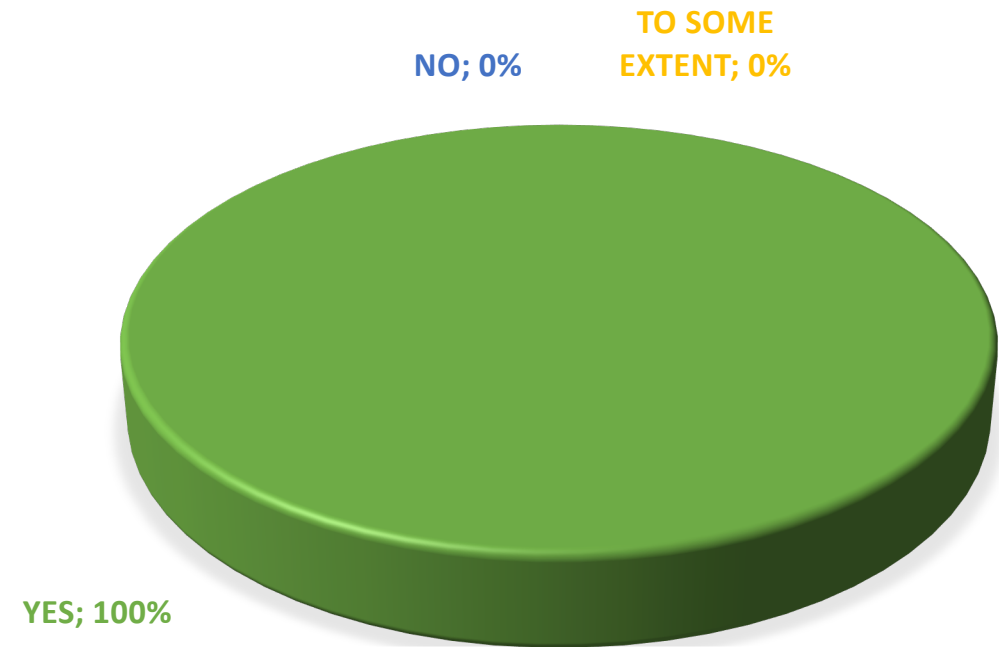

# Results

## COURSE LEVEL IN RELATION TO YOUR EXPECTATION

## THE COURSE FACILITATED THE APPLICATION OF MODULE TOPICS TO BE IMPLEMENTED IN AN INTERVENTION AND TREATMENT PROCESS FOR CHILDREN WITH SUD

# Evaluation and Monitoring of the implementation of the CHILD Course

- CHILD CARRE TOOL
- The CHILD CARRE measure consists of a semi-structured interview designed to be administered by trained and expert personnel.
- The CHILD CARRE instrument covers seven áreas of interest: physical health, school attendance and social support, drug and alcohol use, legal status, family and social relationships, psychiatric health, and daily activities.
- The first test will be taken before the implementation of CHILD ,then at 3 months and 6 months after the implementation.
- Part of this would be to examine changes in CHILD CARRE scores before and after the intervention.

If your actions inspire children to dream more, to learn more,  
to do more, and to be something more, then you truly  
deserve to be called a **TEACHER**
